

## Top new releases of the 3rd quarter!

Photo field • Search filter  
• Integrations • Drafts

Check out our video

### 1 | New features in the photo field 📷

#### Force capture in portrait or landscape mode

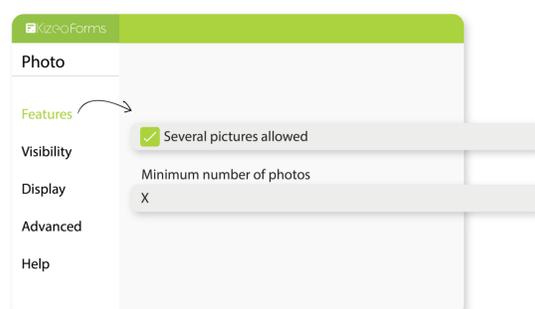

Enforce the **orientation of a photo in portrait or landscape mode** on the Kizeo Forms camera in the mobile application.

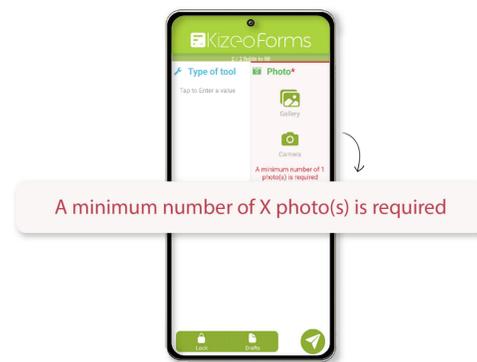

The **mobile user** will receive a **message** indicating the mode to be used.

Check out the tutorial

#### Choose the minimum or maximum number of photos to insert

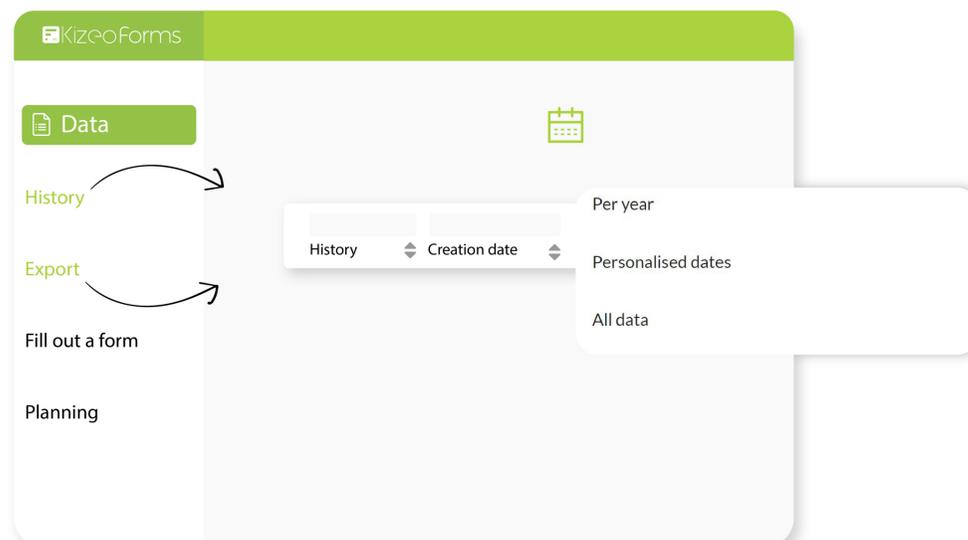

Choose the **minimum and maximum number of photos** to insert in a **multiple photo field**.

The mobile user will receive a **message** indicating the **number of photos to be inserted** in the field.

## 3 | Integrations on the administration interface 🖥️

You can now log in to your **Dropbox** account directly from the **administration interface**. All future integrations will be available under this section.

#### 4 | Restoration of drafts

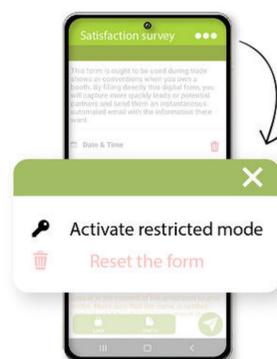

**Experiencing any problems with your smartphone?**

From the mobile application, it is now possible to **retrieve your drafts** that were saved within the last 90 days.

Fill in your data without any worries!

#### 🌟 **Upcoming release | 'Restricted' mode** for your data entries

**Lock a device** for a specific use to monitor the data on the device! This new restricted mode limits access to a specific form by **only permitting data entries**.

The advantages?

- **Secure your work records** and control access rights
- Increase your **users' productivity** and avoid data entry errors
- Offer your users a **tailored experience**

## **Bonus!** | Start the GPS route to the geolocated point 📍

After filling in the geolocation field, a **green icon** will appear on the right. Tap it to open the GPS application on your mobile device and **start the route**.

"I work throughout the year with our technical team to continually deliver developments, **innovation and value** for money in order to meet your expectations from our tool. "

**Charles Leconte - Product Owner at Kizeo**

**Test the new features!**
