

## Top new releases of the last quarter!

Photo field • Deep Linking • Geolocation field  
• Form Headings • Calculation field

Watch the video

---

### 1 | Watermark your photos with the date and time! 📅

Now you can display the date and time your photos were taken as a watermark in ISO (international) format in the bottom right-hand corner of the photo.

- Prevent a photo from being uploaded from the galleries (phone and application).
  - Prevent photo modifications, once the photo is validated.
- 

### 2 | New fields compatible with Deep Linking!

Deep Linking is a simple way to direct users to specific content on the Kizeo Forms mobile application.

It is now possible to pre-fill the List, Geolocation, Barcode and NFC Tag fields via Deep Linking.

---

### 3 | New tags available for the Geolocation Field! 📍

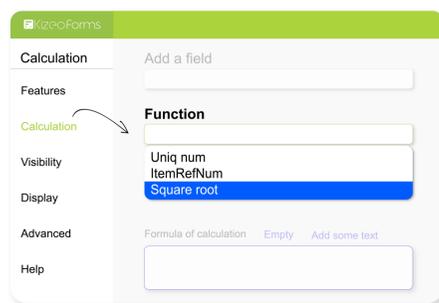

- Altitude tag: #geolocation:altitude##
- Coordinate tag in DMS: #geolocation:dms##

The "Altitude" column is also available along with the "Latitude" and "Longitude" columns in the History section.

## 4 | Categorise your forms under headings

- Change the heading of the form you have subscribed to using the "MORE" button in the "My Forms" menu.
- This same "Headings" button also allows you to create a new heading to classify your forms.

## 5 | Calculate square roots with the Calculation Field!

Calculating a square root is now possible among the formulas proposed by the Calculation Field.

Select the formula via the "Calculation" tab in the "Function" drop-down list!

## Bonus

### A brand new look for the "Help & search" button!

The "Help & Search" pop-up in the bottom right-hand corner of the web platform's homepage has been redesigned for a better user experience.

"I work throughout the year with our technical team to continually deliver developments, innovation and value for money in order to meet your expectations from our tool. "
